International Understanding and Communication

Asako Uchibori

The purpose of this course is to deepen international understanding as well as to enhance skills for international communication. In this semester, students will have online sessions with students at MIT and KTH in Japanese and/or English. Some online sessions will be conducted outside of school hours due to time differences. In class, students will share their feedback to improve their ability to effectively communicate with people from various cultural and linguistic backgrounds around the world.

Lui Yoshida · Yusuke Tsuji : innovation-for-well-being@googlegroups.com

Global Co-creation Innovation Program

Lui Yoshida · Yusuke Tsuji

In these courses, under the theme of "Innovation for Well-being: The Challenge of Creating a World Beyond GDP," students will be able to cultivate the ability to co-create with their peers and create innovation, which will be indispensable in the future, and at the same time, deepen their understanding of the current and future state of society, economy, and environment in Japan and other countries. In this program, students will conduct business studies and make proposals while deepening their understanding of the content, mainly in Japanese. The final presentation will be had in English. We will also have guests who are active overseas take the stage to create an environment where participants can get a real feel for how innovation is actually taking place.

A V Undergraduate FEN-CO3945S3 Graduate 3799-425

Akito Murayama : aktmurayama@g.ecc.u-tokyo.ac.jp

Urban Project

Akito Murayama and others

Students are asked to propose a future built and social environment of a selected district among diverse urban areas in Tokyo after discovering its issues and attractiveness, and assuming future environmental, social and economic changes. Built environment includes buildings, public space and urban infrastructure. Students of various expertise including urban planning, environmental engineering, civil engineering and architecture will work in a group intensively for 1 to 2 month(s) in A1A2 term in collaboration with the Urban Design Studio of Department of Urban Engineering.
Visit <http://www.due.t.u-tokyo.ac.jp/english/edu/lectures/urban-design-studio/> to see the summary of proposals from the previous studios.

Kazuko Ushiyama : kazuko.ushiyama@jlcse.t.u-tokyo.ac.jp

International Collaborative Learning Course

Kazuko Ushiyama

This course proposes an In person (face to face) & COIL-type (Collaborative Online International Learning) and a project-type learning program for students at the University of Tokyo and Caltech (California Institute of Technology). We will learn the similarities and differences between Japanese and American societies and cultures by using English and Japanese as foreign languages for each student. This course aim to offer activities that will help those who are interested in international exchange and cross-cultural understanding, and those who are considering studying in the USA or other English-speaking countries in the future.

(Special) International Collaborative Workshop VII

Undergraduate FEN-CO3996P3 Graduate 3799-437

Yuka Akiyama : akiyama@cce.t.u-tokyo.ac.jp

Virtual Exchange for Global Citizens

Yuka Akiyama

This course is a project-based collaboration where students from the University of Tokyo partner with Japanese language learners at Princeton University. Together, they tackle a range of tasks using both Japanese and English. The course is divided into three key segments: lectures, interactive international communication exercises, and final presentations. By engaging in cross-border and interdisciplinary interactions, students are expected to develop linguistic and intercultural competence, both vital for global effectiveness. The course's projects are designed to foster genuine global citizenship, emphasizing the significance of diversity and going beyond superficial comparisons of nation-states.

(Special) International Collaborative Workshop VIII

Undergraduate FEN-CO3997P3 Graduate 3799-438

Asako Uchibori : uchibori@cce.t.u-tokyo.ac.jp

Learning English Communication Skills through International Exchange

Asako Uchibori

During this course, students will participate in online language-exchange sessions in which they will communicate with students at MIT in Japanese and English, as well as on-campus English lessons on topics related to the sessions. Online sessions will be conducted outside of school hours due to time differences. Upon completion, students will improve their ability to effectively communicate in English with people from various cultural and linguistic backgrounds in the world.
